

Data Files Outline

Paper: Replacement Rates in the Statutory Pension System

Authors: Sebastian Kluth und Martin Gasche

The following overview describes all the data files concerning the paper.

1. Information regarding the dataset (folder name: Informationen zum Datensatz)

Ausführliche Datensatzbeschreibung (Codeplan) VVL 2010.pdf: This file contains a thorough documentation of the dataset used in the paper, namely *Biografiedaten zu Vollendeten Versichertenleben (VVL) 2010* released by the research data center of the German pension authority (*Forschungsdatenzentrums der Deutschen Rentenversicherung*). The documentation comprises not only a detailed description of all the variables available in the dataset but also a description of how the sample was generated.

Informationen zum Datenzugang.pdf: This file explains how to apply for the data used in the paper. It lists the corresponding addresses and contact persons of the research data center of the German pension authority.

2. Stata data (folder name: Stata Daten)

Stata do-file.do: The do-file comprises the complete code regarding the definition of all variables plus the analysis.

Stata log-file.smcl: The log-file gives a full record of the Stata session.

Stata output.pdf: This file gives a full record of the Stata session as a pdf. All results of the paper can be found in this file.
