There are 4 Stata-files in this directory:

    00_master.do
    01_import.do
    02_preperation.do
    03_decomposition.do

Make sure they are in the same working directory of Stata, change the path in 00_master.do and run it.

Data files are not included due to legal reason. However, we used the 2010 wave of the Structure of Earnings Suvrey (see readme_data.txt).
